PROJECTS

Notion clone | *Next JS* | Live Link

- Developed Lotion, a Notion clone, leveraging modern technologies including Next.js, Clerk, Convex,and Edgestore.
- Implemented features such as authentication, rich text editing, database integration, and file upload to provide users with a collaborative workspace for note-taking and task management.
- Utilized Zustand for efficient state management and employed Shadcn with Tailwind CSS for enhanced design aesthetics.

Wallet App | *Next JS* | Live Link

- Developed a full-stack wallet application utilizing Next.js, PostgreSQL(Prisma ORM), Tailwind CSS, and TurboRepo.
- Implemented authentication using NextAuth.js.
- Integrated bank webhook to simulate real-time wallet fund additions, demonstrating proficiency in API integration.

Expense Tracker | *React* | Live Link

- Developed an Expense Tracker application using React to track income and expenses.
- Implemented features such as adding and deleting transactions, and displaying balance.
- Utilized React hooks for state management and functional components for modular development.

Airbnb Homepage clone | *React* | Live Link

- Airbnb-inspired project featuring a dynamic homepage, seamless sign-in/sign-up functionality, and robust mobile responsiveness.
- Utilizing Tailwind CSS streamlined the design process, allowing for rapid development of visually appealing and responsive user interfaces.

EXPERIENCE

Web Publisher   Sept 2022 – Present
UBS Business Solutions Pvt. Ltd   *Airoli, Mumbai*

- Developed sites with the MFA(Mobile First Approach) to be as accessible as possible.
- Implement SEO best practices within **AEM** to optimize website visibility and search engine ranking.
- Completed training in web accessibility standards, including WCAG 2.0 and 2.1, and applied this knowledge to revamp website designs, resulting in improved accessibility for users with disabilities.
- Used tools like SiteImprove to increase the quality of web pages.
- Proficiently utilized **JIRA** ticketing tool to independently manage personal work queues, ensuring streamlined task assignment, tracking, and completion, without the need for constant Team Lead oversight.
- Played an instrumental role in the ideation and conceptualization of innovative components and features for global implementation, contributing to enhanced user experiences and website functionality.

Web Developer   March. 2021 – Sept 2022
Accenture Pvt Ltd.   *Vikhroli, Mumbai*

- Tool used: **AEM**(Adobe Experience Manager) 6.6, AEM TOUCH UI, Classic UI, Publishing content.
- Effectively managed and contributed to two distinct deals, spanning the automobile and pharmaceutical sectors, enriching my knowledge base with diverse industry insights and strengthening my decision-making capabilities.
- Worked extensively with **Workfront**, a robust ticketing tool employed for project management and workflow coordination.
